All About My Ancestor Interview

Task: Interview your ancestor (living family member).

Complete each question in complete sentences.

Draw a picture or glue a photograph of your ancestor.

1. What is your full name?

2. Where were you born?

3. What did you do as a child?

4. What is important to you now?

Parent Tips

The goal of this assignment is to improve reading comprehension through fluent reading. So, even though the students are only expected to read 50-100 words per minute, we have to give them enough information to think about. There's very little skill required to understand a 50 word story! As the year progresses, you'll notice the stories getting longer and more complex. This is to match your child's growth as a reader.

1. Red, yellow, and blue _____ the other colors.
 - fix
 - find
 - make
2. Red-violet has more red than _____.
 - green
 - blue
 - yellow
3. What is the main idea of this passage?
 - Red, yellow, and blue are important colors.
 - Red, yellow, and blue are the prettiest colors.
 - Red, yellow, and blue should be your favorite colors.
4. Tell about your favorite color.

Three Special Colors

Look around you. Unless you are in a cave, you can see lots of colors. 15

Your shirt may be one color. Your pencil may be a very different color. 29

A tree, a book, your hair...so many colors to see! Of all the colors, three 45

are most important. Those colors are red, blue, and yellow. What if you 58

do not like those colors? Maybe your favorite color is green. Well, 70

without blue and yellow there could not be green. All other colors are 83

made by mixing red, yellow, or blue. Think about the color red and the 97

color blue. If you mix them, you get purple. Another word for purple is 111

violet. So you can say that red and blue make violet. If you mix a little 127

more red than blue, the purple will be redder. That color is red-violet. 141

If you mix a little more blue, the purple will be bluer. Can you guess what 157

that color is called? You are right—it is blue-violet! Red, yellow, and 171

blue are special because they make other colors. They are also special 183

because they cannot be made from other colors. We call red, yellow, 195

and blue primary colors because they come before any other color. 206

Name _____

Look at each pattern. Make the next shapes on the lines.

Read the story and then make some text-to-self connections.

connections RL.2.7

When Grandma came to visit, she brought me a jar of bubbles. I took them outside to blow them. I love watching bubbles float away. They look like they have a rainbow inside. If I could get inside a bubble could I touch the rainbow? Or would everything I see look like a rainbow? And could I float far away? I wouldn't mind floating away from my brother. Then he couldn't boss me. I could go someplace where I didn't have to share my toys or eat broccoli. It would be nice to fly away from the things I don't like, but I would miss all the things I love. My mom wouldn't be there. And neither would my stuffed bunny or my pet goldfish. I guess I'll stay here and do things I don't like sometimes. But I don't have to listen to what my brother says!

How the story is the same as my life:

How it is different than my life:

Answer each problem as quickly as you can without using your fingers. If you don't know the answer right away, put a circle around the problem and go to the next one. After you've finished all the problems you know, go back and work out the problems you circled. Can you think of a way to remember these problems so you will know them next time?

Read the sentence and the words below. Which word shows something *possessives L.2.2* belongs to someone?

- The cat plays with a bell. The _____ bell is shiny.
 cats cat's cates
- Ron has a new hat. _____ hat is blue.
 Ron's Ronss Rons
- Pam read a book. _____ book was funny.
 Pams' Pams Pam's
- The bird sings a song. The _____ song is pretty.
 birds birds' bird's

Match each picture with the correct spelling.

childs

children

clothes

clotheses

moths

mothes

Name _____

{ Problem Solving }

33

Solve the problems. Then **explain your thinking** using words, numbers, or pictures. 2.OA.1

There are 6 frogs and 2 puddles. There is the same number of frogs in each puddle. How many frogs are in each puddle?

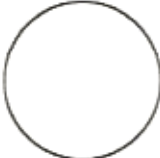

Write a story problem that has an answer of **31 stickers**.

In my family there are 4 kids. In my cousin's family there are 5 kids. Can we all ride in a van that has 8 seats?

Write a number sentence that matches your story.

ACTIVITY 7

DIRECTIONS: Fill in the chart using Y for yes or N for no as you solve the puzzle.

A girl, a boy, and their mom and dad all have favorite shapes. Find each person's favorite shape.

1. The dad's and the mom's shapes have sides of different lengths.
2. The girl's shape has no straight lines.
3. The boy's shape has one less side than the mom's shape.

Syllabication Practice 4

Task: Divide each word by putting a slash (/) symbol between each syllable. Then write how many syllables each word has. Use a dictionary if you're not sure where to divide the syllables.

Example: c o f / f e e 2 syllables

1. b a n k r u p t

2. p l u r a l

3. g l a c i e r

4. m e t h o d

5. c o u r a g e

Standards Addressed:

Decoding and Word Recognition

- 1.1 Recognize and use knowledge of spelling patterns (e.g., diphthongs, special vowel spellings)
- 1.2 Apply knowledge of basic syllabication rules (e.g., vowel-consonant-vowel = su/per; vowel-consonant/consonant-vowel = sup/per).
- 1.3 Decode two-syllable nonsense words and regular multisyllable words.

Mrs. Kennedy

2012-2013

Use these numbers to write equations:

1 5 8 9

$$\square - \square = 1$$

$$\square - \square = 2$$

$$\square - \square = 3$$

$$\square - \square = 4$$

$$\square + \square - \square = 5$$

$$\square \square - \square = 6$$

$$\square \square - \square = 7$$

$$\square - \square = 8$$

$$\square \square - \square = 9$$

$$\square + \square = 10$$

$$\square \square - \square = 11$$

$$\square - \square + \square = 12$$
